Media Asset Link: [View folder here](#)

Dear Media Guest,

Thank you for joining us for **SpeakNova AI in Action: An Evening of Applied AI for Modern Business**.

This event marks an important moment for SpeakNova as we showcase two connected parts of our AI product ecosystem: our commercially available **SpeakNova Voice Agents** and the official launch of **Omni**, our AI work environment powered by an intelligent operating layer.

Our goal is to move the AI conversation away from abstract hype and into practical business deployment. The evening is designed to show how AI can help real businesses answer calls, capture leads, manage follow-ups, organize conversations, and begin automating workflows across voice, email, SMS, WhatsApp, and connected business systems.

SpeakNova started operations in September 2025 with a focus on helping small and mid-sized businesses deploy AI without needing to build internal technical teams. Our voice agents were commercially launched in September 2025 after development began in Q1 2025. Omni will be introduced at this event and made available to clients beginning June 1, 2026 as an MVP launch.

During the evening, you are welcome to film demonstrations, record your own call experience with the AI agent, speak with the founders, interview participating clients and speakers where available, and explore the live product experience. We ask that client names, customer data, or private operational details not be published without consent.

For interviews, follow-up information, or media assets, please contact press@speaknova.com.

Sincerely,

The SpeakNova Team

MEDIA ADVISORY

SpeakNova to Host Toronto Event Showcasing AI Voice Agents and Launching Omni, an AI Operating Layer for SMB Operations

Toronto, Ontario – 20th April 2026 – SpeakNova, a Toronto-based AI agency providing voice and operational AI solutions for small and mid-sized businesses, will host **SpeakNova AI in Action: An Evening of Applied AI for Modern Business** on **Tuesday, May 12 from 6:00 PM to 9:00 PM** at **Meláni Greek Restaurant, 2537 Yonge Street, Toronto**.

The invitation-only event will showcase SpeakNova's AI Voice Agents and mark the launch of **Omni**, SpeakNova's AI work environment powered by an intelligent operating layer. Omni is designed to help businesses deploy multiple specialized AI agents across communication channels, workflows, and existing systems.

The evening will include live voice demos, an Omni platform walkthrough, founder and client discussions, product demonstrations, and networking with business leaders, media, partners, and operators exploring practical AI deployment.

What: SpeakNova AI in Action: An Evening of Applied AI for Modern Business

When: Tuesday, May 12, 6:00 PM – 9:00 PM

Where: Meláni Greek Restaurant, 2537 Yonge Street, Toronto

Who Should Attend: Business owners, operations leaders, media, partners, and executives interested in applied AI for SMB operations

Media Contact: press@speaknova.com

Public CTA: Visit SpeakNova.com to book a demo or email support@speaknova.com.

Event Agenda

6:00 PM: Arrival and check-in

6:30 PM: Welcome: The State of Applied AI

7:00 PM: Product Keynote: Voice Agents + Omni Launch

7:30 PM: Founder & Client Discussion: Real-World Wins

8:00 PM: Live Demos, Kiosk Interaction, and Networking

Journalists and influencers may film product demonstrations and record their own AI agent call experience. Client names, dashboards, and private customer information should not be used publicly without consent.

FOR IMMEDIATE RELEASE

SpeakNova Launches Omni and Showcases AI Voice Agents at First Toronto Event

Toronto-based AI agency brings applied AI demonstrations to business owners, media, partners, and operators

Toronto, Ontario – 20th April 2026 – SpeakNova, a Toronto-based AI agency focused on AI voice agents and operational AI solutions for small and mid-sized businesses, will host **SpeakNova AI in Action: An Evening of Applied AI for Modern Business** on **Tuesday, May 12** at **Meláni Greek Restaurant** in Toronto.

The event will mark the public launch of **Omni**, SpeakNova's AI work environment powered by an intelligent operating layer, alongside live demonstrations of SpeakNova's AI Voice Agents. Omni will be available to clients beginning **June 1, 2026** as an MVP launch.

The evening is designed to move the AI conversation beyond theory by showing how businesses can deploy AI into customer communication, lead handling, follow-up, scheduling, workflows, and connected systems.

"Businesses are past the stage of asking whether AI matters. The real question now is how to deploy it responsibly, practically, and in a way that improves the business from day one," said **Maher Murshed, Founding Partner and CEO of SpeakNova**. "SpeakNova was created to help companies do exactly that – starting with voice agents and expanding into Omni as a broader operating layer for AI-powered business execution."

SpeakNova Voice Agents are designed to handle inbound and outbound calls, qualify leads, answer customer questions, route calls, trigger follow-ups, and escalate to humans when needed. The company's voice offering is positioned

as a managed, done-for-you service, allowing clients to deploy AI call handling without building scripts, managing prompt logic, or configuring technical workflows themselves.

Omni expands the company's offering beyond voice by creating an AI operating environment where multiple specialized agents can work across channels such as email, SMS, WhatsApp, voice, CRM, calendars, accounting, ERP, inventory, and other business systems. **Omni** is designed to interpret intent, preserve context, determine the next best action, and increasingly execute workflows such as creating deals, tasks, bookings, summaries, proposals, invoices, and updates.

At the event, guests will be able to watch the platform in action, interact with live demos, make calls to SpeakNova's AI agent, and speak with the company's team about specific business use cases and ROI opportunities.

SpeakNova began operations in September 2025. Its Voice Agents were commercially launched in September 2025 following development that began in Q1 2025. Omni will be launched at the May 12 event and made available to clients beginning June 1, 2026.

Plans for SpeakNova Voice Agents begin at **\$149 per month for 150 minutes**. Plans for Omni begin at **\$299 per month**. Pricing varies based on usage, integrations, customization, and workflow complexity.

About SpeakNova

SpeakNova is a Toronto-based AI agency helping businesses deploy custom AI voice agents and operational AI solutions. The company builds, trains, deploys, and manages inbound voice agents, outbound voice agents, chat agents, dashboards, integrations, and Omni – an AI work environment designed to orchestrate specialized agents across business communication and workflows.

SpeakNova's managed service model is built for businesses that want the benefits of AI automation without needing to design prompts, build agents, configure workflows, or manage technical deployment on their own. SpeakNova helps companies reduce missed calls, improve customer response, automate repetitive communication, and create a scalable foundation for AI-enabled operations.

SpeakNova started operations in September 2025 and is developed by OHS Global Inc. The company focuses on practical, deployable AI that improves customer management and collaboration – helping businesses respond faster, capture more opportunities, and run tighter operations.

About SpeakNova Voice Agents

AI Voice Built for Real Conversations

SpeakNova Voice Agents are custom-built AI agents designed to handle business calls at scale. They can answer inbound calls, qualify leads, respond to FAQs, route calls, capture information, book appointments, run outbound follow-ups, send SMS confirmations, and escalate to a human team when required.

The goal is simple: help businesses reduce missed calls, improve response speed, deliver consistent customer experiences, and reduce repetitive staff workload.

Core Capabilities

- 24/7 inbound call handling
- Outbound follow-up campaigns
- Lead qualification
- Appointment booking
- Smart routing and hot transfer
- SMS follow-ups
- Email summaries
- Call record retention
- Multilingual support
- Live web crawling
- Dashboard insights
- Human escalation when needed

Common Use Cases

- Inbound lead capture
- After-hours coverage
- Customer support and FAQs
- Appointment booking
- Smart routing and hot transfer
- Internal help desk
- Employee onboarding
- SMS follow-ups
- Outbound call campaigns

Industries Served

SpeakNova Voice Agents are designed for businesses that depend heavily on incoming and outgoing calls, including healthcare facilities, service businesses, car dealerships, retailers, agencies, restaurants, storage companies, wellness businesses, property services, and e-commerce retailers.

Pricing Positioning

Plans for SpeakNova Voice Agents begin at **\$149 per month for 150 minutes**. Pricing varies based on call volume, integrations, customization, multilingual support, and workflow complexity.

Introducing Omni

SpeakNova's AI Operating Layer for Agent Orchestration, Business Communication, and Workflow Execution

Omni is SpeakNova's AI work environment for deploying multiple AI agents across a business. It is designed to sit above existing communication channels and business systems, allowing companies to gradually connect voice, email, SMS, WhatsApp, CRM, accounting, calendar, ERP, inventory, and workflow tools into a single AI-enabled operating layer.

Omni is designed as a shared environment where different AI agents can specialize in different areas of the business, including sales, support, billing, operations, scheduling, finance, and follow-up.

Omni will launch publicly on **May 12, 2026** and will be available to clients beginning **June 1, 2026** as an MVP launch.

What Omni Does

Omni helps businesses move from fragmented communication to coordinated action.

It can capture inbound messages, campaign replies, and voice handoffs; understand intent, context, and urgency; route the work to the right specialized AI agent; and execute next steps such as creating deals, tasks, bookings, summaries, proposals, invoices, or updates.

Why Omni Matters

Most businesses already have software. The problem is that conversations, customer context, and operational follow-through are often spread across disconnected tools. Email, SMS, WhatsApp, phone calls, CRM records, accounting systems, calendars, and internal workflows may all hold different pieces of the same customer or operational story.

Omni is designed to act as the intelligent operating layer above that stack, helping businesses interpret intent, preserve context, determine next steps, and increasingly execute workflows.

Pricing Positioning

Plans for Omni begin at **\$299 per month**. Pricing varies based on users, channels, agent configuration, connected systems, and workflow complexity.

Product Fact Sheet: SpeakNova Voice Agents

Product Name: SpeakNova Voice Agents

Category: AI voice agents / conversational AI / business automation

Primary Users: SMBs, mid-market businesses, service businesses, restaurants, retailers, healthcare and wellness providers, dealerships, agencies, e-commerce businesses, and operations teams

Deployment Model: Managed service / done-for-you implementation

Core Functions: Answer calls, qualify leads, book appointments, answer FAQs, send follow-ups, run outbound calls, escalate to humans, summarize interactions

Human Escalation: Yes

Typical Deployment: Many deployments can go live in days, depending on complexity, integrations, workflows, and required approvals.

Pricing: Plans begin at \$149 per month for 150 minutes.

Best Fit: Businesses that lose revenue from missed calls, slow follow-up, repetitive inquiries, inconsistent phone handling, or limited staff coverage.

Key Differentiator: SpeakNova is managed end-to-end, including custom agent buildout, scripting, deployment, and ongoing tuning rather than asking customers to build their own AI agents.

Product Fact Sheet: Omni

Product Name: Omni

Category: AI work environment / agent orchestration / business operating layer

Launch Date: May 12, 2026

Client Availability: June 1, 2026 as an MVP launch

Primary Users: SMBs and mid-market businesses with multiple communication channels and connected systems

Primary Channels: Email, SMS, WhatsApp, voice, chat, CRM-style conversation workspace

Core Functions: AI-operated inbox, assignable AI agents, next-best actions, workflow automation, campaign management, performance reporting, CRM-style contact and deal management, conversation summaries, and smart escalation

Agent Types: Sales, support, billing, operations, scheduling, finance, and other specialized agents

System Connections: CRM, ERP, accounting, calendar, inventory, and other business systems

Governance: Role-based access, channel-level visibility, shared/private operating models, encryption in transit and at rest, cloud infrastructure, monitoring, logging, and alerting

Pricing: Plans begin at \$299 per month

Best Fit: Businesses with fragmented communication, scattered customer context, manual follow-up, disconnected systems, and growing interest in practical AI deployment without a full rip-and-replace transformation

Approved Website Testimonials to Use, Subject to Final Client Consent

Wellness Shop

Duane Passero, Director of Retail Operations, Wellness Shop

“SpeakNova cut hold times and closed after-hours gaps. The call summaries highlight issues and opportunities, helping us improve operations and convert more inquiries to sales.”

Uniform Pros

John Phyllis, President, Uniform Pros

“Since adding SpeakNova, sales are up and customer experience improved. Our phones are answered 24/7 with instant product answers and text links customers can use.”

Calgary Commercial Refrigeration

Josh DePellegrin, President, Calgary Commercial Refrigeration

“We’ve been impressed with both the voice agent and the SpeakNova team. Once they learned about our needs, they went to work and delivered a great product that helps our customers 24/7. We are able to implement changes on the fly, review call transcripts and receive custom notifications and lead gen in our CRM. We are now at 3 voice agents and counting!”

Key Messages for Journalists

Main Message

SpeakNova is helping businesses move from AI curiosity to applied AI deployment by combining managed voice agents with Omni, an AI operating layer for communication, agent orchestration, and workflow execution.

Supporting Messages

1. Applied AI, not AI theatre

The event is designed to show live demos, real workflows, and practical use cases rather than abstract predictions about the future of AI.

2. Voice is the entry point

Phone calls remain one of the most important business channels. SpeakNova Voice Agents help businesses answer calls, qualify leads, follow up, and escalate to humans when needed.

3. Omni is the next layer

Omni takes the work beyond the call by connecting voice, email, SMS, WhatsApp, CRM-style contact management, AI agents, workflows, and reporting in one operating environment.

4. SMBs need deployment help, not just tools

Most small and mid-sized businesses do not have the time, technical resources, or internal AI teams to configure agents themselves. SpeakNova's managed service model is built around deployment, onboarding, tuning, and support.

5. Human control remains central

Omni's agent model includes confidence thresholds, human review, permissions, visibility controls, and escalation paths so companies can automate without losing oversight.

6. The practical value is speed, consistency, and follow-through

SpeakNova is focused on reducing missed calls, improving response times, supporting consistent customer communication, organizing conversations, and helping teams act faster on leads and customer requests.

Founder / CEO Bio

Maher Murshed

Founding Partner and CEO, SpeakNova

Maher Murshed is an international entrepreneur with a twenty-year track record of building hospitality brands, design-led businesses, and scalable operating platforms across multiple sectors.

He is the Founding Partner and CEO of SpeakNova, an AI solutions agency developed by OHS Global Inc. SpeakNova focuses on practical, deployable AI that improves customer management and collaboration – helping businesses respond faster, capture more opportunities, and run tighter operations.

The company's current product suite includes AI Voice Agents, commercially launched in September 2025 after development began in Q1 2025, and the Omni platform, launching in May 2026. Together, these solutions enable

businesses to manage customer conversations and leads across channels through a unified, AI-enabled workflow – handling inbound requests, FAQs, lead qualification, appointment booking, and escalation to human teams when needed, while keeping communication organized and trackable.

Maher is also the Founding Partner and CEO of WorkFreeli, a collaboration SaaS platform developed in-house over the past three years and soft-launched in September 2025. WorkFreeli is designed as an all-in-one business collaboration and operations platform, starting with core modules like chat, voice, and video, and extending into advanced modules including accounting, purchasing, inventory, and procurement.

Across SpeakNova and WorkFreeli, Maher leads a team of approximately 30 full-time developers operating internationally.

In parallel, Maher is President of OHS Global Inc., a management consulting and investment firm rooted in hospitality, technology, and design. He also serves as Chairman of the Ascent Group, which owns and operates a diverse portfolio across education, retail, and construction in South Asia.

Spokespersons

Approved Spokespersons

SpeakNova Founders

The founders of SpeakNova, Maher Murshed, Trevor Wasney, Anwar Ali and Voytek Mardula, are approved spokespersons for the company, product strategy, commercial vision, event purpose, voice agent deployment, Omni launch, and future product roadmap.

Additional Interview Opportunities

Subject to availability and consent, journalists may also interview:

- Participating SpeakNova clients
- Event speakers
- Product or engineering team members
- Business operators using or testing SpeakNova solutions

Interview Guidance

Journalists may film demos and record calls with the AI agent. Client names, private dashboards, customer data, operational details, or identifiable client information should not be published without consent.

Founder Quote Options

Quote Option 1 — Primary Press Release Quote

“Businesses are past the stage of asking whether AI matters. The real question now is how to deploy it responsibly, practically, and in a way that improves the business from day one. SpeakNova was created to help companies do exactly that – starting with voice agents and expanding into Omni as a broader operating layer for AI-powered business execution.”

– **Maher Murshed, Founding Partner and CEO, SpeakNova**

Quote Option 2 — Event Quote

“This event is about showing applied AI in the real world. We want journalists, business owners, partners, and operators to see the technology live, ask hard questions, test the agents, and understand how AI can actually be deployed inside a business today.”

– Trevor Wasney, **Founding Partner and President, SpeakNova**

Quote Option 3 — Omni Quote

“Voice agents solve an immediate problem: missed calls, slow response, and repetitive customer communication. Omni is the next step. It gives businesses a way to deploy multiple AI agents across channels and workflows, while keeping people in control.”

– Voytek Mardula, **VP Sales, SpeakNova**

Quote Option 4 — SMB Adoption Quote

“Most small and mid-sized businesses do not need another complex tool to manage. They need a practical AI partner that helps them deploy, test, monitor, and improve. That is the role SpeakNova is designed to play.”

– Maher Murshed, **Founding Partner and CEO, SpeakNova**

Suggested Story Angles

For Technology Journalists

A Toronto AI company is launching an operating layer for SMB agent deployment.

Focus: Omni, specialized agents, connected workflows, AI orchestration, human escalation, business systems integration.

For Business Media

How small and mid-sized businesses are moving from AI experimentation to operational deployment.

Focus: SMB adoption barriers, cost of missed calls, staff capacity, automation without large technical teams.

For AI Media and Newsletters

Beyond chatbots: SpeakNova's Omni platform aims to orchestrate specialized business agents.

Focus: agentic AI, multiple agents, permissions, confidence thresholds, task execution, workflow automation.

For Toronto / Canadian Innovation Media

Toronto-based SpeakNova hosts applied AI showcase for business owners and media.

Focus: local company, Toronto event, practical AI demos, Canadian-built solutions.

For Influencers and LinkedIn Creators

What happens when AI answers the phone, follows up by SMS/email, and updates the workflow?

Focus: live demo content, founder soundbites, quick clips, business owner reactions.

For SMB and Entrepreneurship Media

The rise of managed AI deployment for companies without technical teams.

Focus: done-for-you implementation, white-glove onboarding, no developer requirement, practical ROI.

Event Agenda Copy for PR Kit

Event Agenda

6:00 PM — Arrival and Check-In

Guests arrive at Meláni Greek Restaurant for registration, cocktails, canapés, and informal networking.

6:30 PM — Welcome: The State of Applied AI

SpeakNova opens the evening with a practical discussion about where AI is today, why adoption is accelerating, and why businesses need deployment strategies rather than scattered tools.

7:00 PM — Product Keynote: Voice Agents + Omni Launch

A live presentation introducing SpeakNova Voice Agents and the Omni platform, including business use cases, deployment approach, product capabilities, and the future of AI-assisted operations.

7:30 PM — Founder & Client Discussion: Real-World Wins

A conversation with SpeakNova founders and selected clients or speakers about practical AI deployment, early lessons, business benefits, and what companies need to consider when adopting AI agents.

8:00 PM — Live Demos, Kiosk Interaction, and Networking

Guests can experience the AI Voice Agent, explore the Omni dashboard, discuss workflows with the SpeakNova team, and network with operators, partners, media, and business leaders.

Demo Experience Guide for Journalists and Influencers

What Guests Can Experience at the Event

1. Call the AI Agent

Journalists and influencers can place a call to SpeakNova's AI agent and hear how it answers, responds, qualifies, routes, and follows up.

3. Explore the Omni Dashboard

The Omni dashboard provides a centralized view of activity, unattended messages, deal volume, escalations, and AI-versus-human handling.

4. See Specialized Agents in Action

Guests can see how different agents – sales, support, billing, operations, and scheduling – can be configured with their own knowledge base, tone, prompt logic, permissions, and tools.

5. Ask About Real Business Use Cases

Examples include restaurant reservations, automotive lead follow-up, service-sector appointment booking, customer FAQs, after-hours coverage, outbound campaigns, and internal support workflows.

6. Discuss ROI and Operational Fit

SpeakNova's team can help guests understand how AI agents may reduce missed calls, reduce repetitive admin work, improve response speed, and create better operational visibility.

Security, Privacy, and Responsible AI Statement

SpeakNova's platform is designed to support businesses using AI for customer communication, voice interactions, messaging, dashboards, and related workflows. The company's privacy policy describes how SpeakNova collects and processes account information, service usage data, prompts, scripts, call recordings, voicemails, transcripts, chat/SMS messages, metadata, support information, and data exchanged through client-enabled third-party integrations.

SpeakNova uses commercially reasonable technical and organizational safeguards designed to protect information against accidental or unlawful destruction, loss, alteration, unauthorized disclosure, or unauthorized access.

Audio call recordings are retained for 60 days from creation. During that period, clients may download recordings from the dashboard for their own records. After 60 days, audio recordings are permanently deleted from the platform and are no longer accessible from the client dashboard or recoverable by SpeakNova. Transcripts, summaries, and non-audio metadata may be retained for longer periods to support analytics, audit trails, and service improvement, subject to applicable safeguards and client agreements.

The platform may enable call recording, monitoring, automated calling, and automated messaging. Clients are responsible for providing legally required notices and obtaining any required consents in relevant jurisdictions.

SpeakNova provides configurable prompts and tools to assist with compliance.

SpeakNova does not sell personal information as defined by applicable privacy laws. The platform may rely on subprocessors, cloud hosting, telephony carriers, analytics, customer support, payment processors, and client-enabled third-party integrations, each subject to relevant contractual and data protection obligations.

For privacy questions, contact privacy@speaknova.com. For legal questions, contact legal@speaknova.com.

Media FAQ

What is SpeakNova?

SpeakNova is a Toronto-based AI agency that builds, deploys, and manages AI voice agents and operational AI solutions for businesses.

When did SpeakNova start operations?

SpeakNova started operations in September 2025.

What is being launched at the event?

The event showcases SpeakNova Voice Agents and marks the launch of **Omni**, SpeakNova's AI work environment powered by an intelligent operating layer.

When will Omni be available to clients?

Omni will launch publicly on May 12, 2026 and will be available to clients beginning June 1, 2026 as an MVP launch.

What are SpeakNova Voice Agents?

SpeakNova Voice Agents are AI agents that can handle inbound and outbound calls, answer questions, qualify leads, book appointments, send follow-ups, and escalate to humans when needed.

What is Omni?

Omni is an AI operating environment that brings business conversations, AI agents, integrations, orchestration, actions, and context into one platform. It is designed to help companies deploy multiple specialized AI agents across different parts of the business.

Is Omni replacing existing business software?

No. Omni is positioned as a layer that works with existing systems. It can connect to channels and tools such as email, SMS, WhatsApp, voice, CRM, ERP, accounting, calendars, inventory, and other business systems.

Who is SpeakNova built for?

SpeakNova is built for SMBs and mid-market companies, especially businesses that depend on customer communication, lead handling, appointments, reservations, follow-up, and operational coordination.

Which industries does SpeakNova serve?

SpeakNova serves businesses that rely heavily on incoming or outgoing communication, including healthcare, wellness, trades, restaurants, retailers, agencies, dealerships, property services, storage companies, and e-commerce retailers.

How quickly can a business deploy a SpeakNova Voice Agent?

Many deployments can go live in days, depending on complexity, integrations, workflows, and client approvals.

Does SpeakNova build its own AI models?

SpeakNova is not positioned as a company building large language models from scratch. Its value is in implementation, prompt engineering, agent configuration, integrations, workflow design, dashboards, and ongoing optimization.

How does SpeakNova handle human escalation?

SpeakNova Voice Agents and Omni can be configured to escalate to a human when required. Omni also includes confidence thresholds and human review when certainty is low.

How much do the products cost?

SpeakNova Voice Agent plans begin at \$149 per month for 150 minutes. Omni plans begin at \$299 per month. Pricing varies based on volume, integrations, customization, and workflow complexity.

Can journalists film demos?

Yes. Journalists can film product demos, and influencers can record calls with the AI agent. Client names, private dashboards, customer data, or client-specific operational details should not be published without consent.

Can journalists publish before May 12?

Yes. There is no embargo unless SpeakNova decides to issue one separately for a specific announcement or asset.

Who should readers contact to learn more?

Readers can visit SpeakNova.com to book a demo or email support@SpeakNova.com.

Boilerplate

About SpeakNova

SpeakNova is a Toronto-based AI agency helping businesses deploy custom AI voice agents and operational AI solutions. The company builds, trains, deploys, and manages inbound voice agents, outbound voice agents, chat agents, dashboards, integrations, and Omni – an AI work environment designed to orchestrate specialized agents across business communication and workflows.

SpeakNova's managed service model is built for businesses that want the benefits of AI automation without needing to design prompts, build agents, configure workflows, or manage technical deployment on their own. SpeakNova helps companies reduce missed calls, improve customer response, automate repetitive communication, and create a scalable foundation for AI-enabled operations.

Media Usage Notes

Journalists and influencers may:

- Film public product demonstrations
- Record their own AI agent call experience
- Quote approved founder statements
- Request founder interviews
- Request interviews with participating clients or event speakers
- Use approved screenshots, logos, and product visuals from the media asset folder

Journalists and influencers should not:

- Publish client names without consent
- Show private client dashboards or customer data
- Publish identifiable customer records, transcripts, phone numbers, or operational information
- Present illustrative ROI scenarios as guaranteed results for every business
- Present MVP Omni capabilities as final enterprise-grade production functionality beyond the approved launch language
